WATER OPERATOR TRAINING

Water Treatment Plant Operation Levels B & C, Module I
Instructor: TBA
Course Number: WFWX0003 AI1 CRN: TBA
Tuition: $148
TBA (Term)
This module covers such topics as defining the characteristics of raw water, pretreatment of raw water, primary treatment of water for drinking water, and chemical disinfection of water.

Water Treatment Plant Operation Levels B & C, Module II
Instructor: TBA
Course Number: WFWX0004 AI1 CRN: TBA
Tuition: $148
TBA (Term)
Topics include EPA regulations for the treatment of water, safety measures utilized in the treatment of water, wastes associated with the treatment of water, iron and manganese removal, lime softening processes, fluoridation, and water regulations.

Water Treatment Plant Operation Levels B & C, Module III
Instructor: TBA
Course Number: WFWX0005 AI1 CRN: TBA
Tuition: $148
TBA (Term)
Course topics include EPA regulations for the treatment of water, safety measures utilized in the treatment of water, management of THMs, maintenance of equipment, advanced laboratory procedures and drinking water rules.

Successful completion of all three modules fulfills course requirements to apply for the Water Treatment Operator Levels B or C certification exam.

WASTEWATER OPERATOR TRAINING

Intro to Wastewater Treatment Plant Operation Level C, Module I
Instructor: TBA
Course Number: WFWX0006 AI1 CRN: TBA
Tuition: $148
TBA (Term)
Upon completion of this module the student will understand the characteristics of wastewater, its delivery to the wastewater plant, primary treatment, biological treatment, and disinfection of wastewater.

Wastewater Treatment Plant Operation Level C, Module II
Instructor: TBA
Course Number: WFWX0007 AI1 CRN: TBA
Tuition: $148
TBA (Term)
Course topics include activated sludge treatment of wastewater, type of wastewater treatment plants, nutrient removal process control and laboratory procedures.

Wastewater Treatment Plant Operation Level C, Module III
Instructor: TBA
Course Number: WFWX0008 AI1 CRN: TBA 1
Tuition: $148
TBA (Term)
Course topics include EPA regulations for the treatment of water, safety measures utilized in the treatment of water, management of THMs, maintenance of equipment, advanced laboratory procedures and drinking water discharge rules.

Successful completion of all three modules fulfills course requirements to apply for the Wastewater Treatment Operator Level C certification exam.

THE UTILITY MANAGER
WATER/WASTEWATER, A
WATER DISTRIBUTION, 1

Instructor: TBA
Course Number: WFWX0016 AI1
CRN: TBA
Tuition: $250
TBA (Term)

This 8-week interactive online course fulfills Florida DEP course requirements to take the Florida DEP Level A exam for either Water Treatment or Wastewater Treatment Plant Operator.

This course addresses the practical application of utility management techniques associated with the orderly operation of water and wastewater treatment facilities.

In addition, the course provides access to online study materials for review of the treatment process portion of the exam.

Online practice tests which simulate the state licensure exam are also included.

All courses are designed to prepare students to take the Florida DEP Operator Certification Exams!

WASTEWATER TREATMENT PLANT OPERATIONS
LEVEL B

Instructor: TBA
Course Number: WFWX0009 AI1
CRN: TBA
Tuition: $450
TBA (Term)

This 15-week course focuses on activated sludge treatments, modified activated sludge processes, nutrient removal processes, residual solids disposal, and effluent discharge.

Note: You must hold a Level C license in order to take the Level B exam.

Water Distribution Operations
Level 3

Instructor: TBA
Course Number: WFWX0010 AI1
CRN: TBA
Tuition: $200
TBA

This 6-week course is designed to prepare students to be successful in passing the state of Florida's DEP licensure test. Includes overview of job requirements and competencies to place water distribution lines and render safe drinking water to the public.
