

Navigating the Library Databases for Nursing

Start at the FGC homepage: <https://www.fgc.edu/> and click on FGC Library.

You can start your search by clicking **Search the Library**, or going to a specific by clicking **Databases A-Z**, or seeing all the Health related databases by clicking **Databases By Subject**.

Students need to be logged in to get access to online resources. The log in is the same as MYFGC or MyCourses using your Wolves email and password.

Note: If you need help, call the library at 386-754-4401 or email library@fgc.edu.

The default **Everything** tab will search the FGC Library for all formats of materials, and the **Articles** tab will search for Full Text Articles and eBooks. You can select the box on the left to limit results to scholarly or peer-reviewed publications.

The screenshot shows the Florida Gateway College library search interface. At the top, there are navigation tabs for "New Search", "Databases A-Z", "Journals A-Z", and "Ask-a-Librarian". Below this is a search bar with "hypertension" entered, and a dropdown menu set to "Keyword". The search results are displayed in a list format, with filters on the left and a sidebar on the right.

Postpartum Circulating Markers of Inflammation and the Systemic Acute Phase Response After Early Onset Preeclampsia

At the article level, click the yellow Cite button

on the right to get an APA style citation of the article.

The screenshot shows the EBSCOhost interface for a clinical practice article. The article title is "Diagnosis and management of preeclampsia: A clinical perspective on recent advances in the field". The abstract discusses hypertensive disorders of pregnancy, including pre-eclampsia and gestational hypertension, and their impact on maternal and neonatal health. The article is from the British Journal of Midwifery, dated April 1, 2015. On the right side of the article, a yellow "Cite" button is circled in red, indicating where to click to generate a citation.

The database citation tool is useful, but it is important for you to review and correct the formatting yourself.

The screenshot shows the "Citation Format" tool in EBSCOhost. It provides instructions for using the tool, including a note to review instructions at the EBSCO Support Site and to pay special attention to personal names, capitalization, and dates. The tool has generated an APA citation for the article: Townsend, R., O'Brien, P., & Khalil, A. (2015). Diagnosis and management of preeclampsia: A clinical perspective on recent advances in the field. *British Journal Of Midwifery*, 23(4), 252-258.

See APA citation resources at the FGC Library under Research Help and Guides (<https://www.fgc.edu/students/library/research/>), including an FGC Video Tutorials, APA Style Home, APA Style Blog and the Purdue OWL.

CINAHL Subject Headings find articles using authoritative search terms, as compared to keyword searches that look for occurrences of words in the article. Subject headings use controlled vocabulary and can build a search using the subject hierarchy and subheadings.

CINAHL Subject Headings are assigned based on article content and help you retrieve more relevant articles. A hierarchy for terms is shown that can be expanded.

- “Major Concept” means the search term will be the major focus of the article.
- “Explode” means the results will include narrower terms.
- “Scope” will give an explanation or definition of terms.

You can select to “Include all Subheadings” on right or choose specific ones to build a search.

Similar Databases (from EBSCO):

- Medline with Full Text - from National Library of Medicine. Includes MeSH Headings
- The Health and Nursing database searches CINAHL, Health Source: Nursing/Academic; and PsycARTICLES

You can cross-search EBSCO databases. Above the search box click Choose Databases and select multiple databases from list.

The screenshot shows the EBSCO search interface. At the top, there is a search bar with the text "Searching: CINAHL Plus with Full Text" and a link "Choose Databases" circled in red. Below the search bar is a search input field with the placeholder text "Enter any words to find books, journals and more" and a green "Search" button. There are also links for "Search Options", "Basic Search", "Advanced Search", and "Search History".

The "Choose Databases" dialog box is open, showing a list of databases with checkboxes. The "Detailed View" option is selected. The list includes:

Nursing Library (Rittenhouse)

Rittenhouse R2 is a collection of over 1,200 Nursing ebooks. You can search a drug or condition by typing it into the large search bar. This will give you a list of results taken from specific chapters of books.

You can refine your results on the left side by Practice Area, Publication Date or Discipline.

The screenshot shows the Rittenhouse Digital Library search results for the term "hypertension". The page includes a search bar with the term entered, a "SEARCH" button, and a "Tools" dropdown menu. The search results are displayed in a list format, with the first result being "Chapter 28 - Hypertension: Nursing Management | Section: HYPERTENSION" from the book "CONTEMPORARY MEDICAL-SURGICAL NURSING, 2nd; Rick Daniels, RN, COL, PhD, Leslie Nicoll, RN, BC, MBA, PhD, Delmar Cengage Learning, 2012". The second result is "Chapter 7 - RENAL AND UROLOGIC DISORDERS | Section: CHRONIC RENAL DISORDERS" from the book "PROFESSIONAL GUIDE TO DISEASES, 10th; LWW, Lippincott Williams & Wilkins, 2013". The left sidebar contains filters for "Include:" (Active, Archive), "Show results from:" (Indexed Terms, Full Text, Chapter Title, Section Title, Images), and "Filter by:" (Practice Area, Publication Date).

Click on an entry in the results list to open the ebook for the full text context.

The screenshot shows the full text view of the "HYPERTENSION" chapter from the book "CONTEMPORARY MEDICAL-SURGICAL NURSING". The page includes a search bar, a "SEARCH" button, and a "Tools" dropdown menu. The text is displayed in a large font, with the title "HYPERTENSION" in bold. The text describes hypertension as a sustained elevation of systemic blood pressure to a level that places the patient at increased risk for target organ damage. It also includes a section on "EPIDEMIOLOGY" which states that approximately 73.6 million adults in the United States have hypertension. The text is followed by a list of statistics:

- 78.7% are aware that they have it
- 69.1% are being treated
- 54.6% do not have it controlled at recommended levels

Clicking on hot links within the articles will perform a new search on that term.

The chapters can be printed, saved, and exported under Tools.

The APA Citation tool is found under Tools/Export Citation, but be sure to make corrections to the information given. See APA citation resources at the FGC Library under Research Help and Guides.

Lymph Vessels

1/1

lymphocyte

Like blood vessels, lymph vessels range throughout the body and organs of the body. Lymph vessels collect and transport lymph fluid. Lymph fluid is made up mostly of excess fluid the cells have taken from blood, called interstitial fluid. It's also made up of fat absorbed from the small intestine, and type a of white blood cell called a lymphocyte. Like other white blood cells, lymphocytes find and destroy disease-causing agents. But most lymphocytes travel through the lymphatic system
