¹ - Limited Access/Limited Enrollment/Special program admission requirements – See college catalog/contact division.

² - Specialized program in partnership with another Florida College System institution. Please reference college catalog.

³ - Baccalaureate level – requires program application in addition to college admissions application.

⁴ - **High School completion is not required for admission to the college under this declared program of study.** Note: While the educational plan you wish to pursue may not require high school completion, graduation from a recognized high school (includes home school completion in accordance with respective state statutes or successful completion of a recognized high school equivalency exam, i.e., GED®) is required for the award and disbursement of financial aid.

• **Excess Hours Statement:** Section 1009.286, Florida Statutes, establishes an “excess hour” surcharge for a student seeking a baccalaureate degree at a state university. It is critical that students, including those entering Florida colleges, are aware of the potential for additional course fees. “Excess hours” are defined as hours that go beyond 120% of the hours required for a baccalaureate degree program. For example, if the length of the program is 120 credit hours, the student may be subject to an excess hour surcharge for any credits attempted beyond 144 credit hours (120% x 120). All students whose educational plan may include earning a baccalaureate degree should make every effort to enroll in and successfully complete those courses that are required for their intended major on their first attempt. Florida college students intending to transfer to state universities should identify a major or “transfer program” early and be advised of admission requirements for that program, including the approved common prerequisites. Course withdrawals and/or repeats, as well as enrollment in courses nonessential to the intended major, may contribute to a potential excess hours surcharge.
